

Create table using html and css

1] create table

- Need to create HTML file that have in body portion

```
<div class="conatiner">
  <table > // for Use Create Table
    <tr> // it use to create Table Row
      <th>Monday</th> // it is use for giving table Head
      <th>Tuesday</th>
      <th>Wensday</th>
      <th>Thursday</th>
      <th>Friday</th>
      <th>Saturday</th>
    </tr>
  </table>
</div>
```

2] Create Css file and link with html file.

```
<link rel="stylesheet" href="table.css">
```

3].create border of table using css.

```
table{
  border: 2px solid black;
}
table tr th{
  border: 2px solid black;
}
```

4] Put data in to table.

```
<tr>
  <td>Maths</td>
  <td>sci</td>
  <td>s.s</td>
  <td>Eng</td>
  <td>sci</td>
  <td>p.t</td>
</tr>
```

Generally we have 8 period in day of school. repeat above code 8 time

- Create border of table data:

```
table tr td{
  border: 2px solid black;
  text-align: center;
}
```

⇒ Table Tag elements:-

- colspan:- it is use to merge column cell (horizontally)

syntax:-

<td colspan=**2**>science</td>

↑
Number of cells to be merge

- rowspan:- it is use to merge row cell(vertically)

syntax:-

<td rowspan=**2**>science</td>

↑
Number of rows to be merge

⇒ Background in table:-

```
table{
  background-color: aqua;
}
```

⇒ Font color In Table:-

```
table{
  color: blue;
}
```

⇒ Padding in table data(td):-

```
td{  
  padding: 5px; // use to give padding around text.  
  padding-left: ; // use to give padding from left side only.  
  padding-top: ; // use to give padding from Top side only.  
  padding-bottom: ; // use to give padding from bottom side only.  
  padding-right: ; // use to give padding from right side only.  
}
```

⇒ Margin table data(td) :-

```
td{  
  margin: 10px; //use to give margin around table.  
  margin-top: ; //use to give margin from top side only.  
  margin-left: ; //use to give margin from left side only.  
  margin-bottom: ; // use to give margin from bottom side only .  
  margin-right: ; // use to give margin from right side only.  
}
```
